EDUCATION

Florida International University | Cum Laude, GPA: 3.5

Miami, FL

Bachelor of Science in Computer Science

December 2025

- **Relevant coursework:** Operating Systems, Systems Programming, Data Structures, Database Management

SKILLS & CERTIFICATIONS

- **Languages:** Java, SQL, C#, Python, HTML, CSS, JavaScript, Swift, C
- **Tools & Technologies:** Spring Boot, React, Expo, Streamlit, Firebase, Supabase, PostgREST, Google Cloud Platform, MySQL, Git, GitHub, Postman, IntelliJ IDEA, Visual Studio, Xcode, NuGet, Unity
- **Certifications:**
 - CodePath Intermediate Web Development (Vite, JavaScript, modern frontend)
 - CodePath Introduction to Cybersecurity (Azure VM, penetration testing, John the Ripper)
 - CodePath iOS Development (Swift, iOS development, mobile UI design)
- **Operating Systems:** Windows, macOS, Linux

EXPERIENCE

ANTI ELIXIR LLC – Software Developer Intern | Miami, Florida

November 2024 – December 2025

- **Led a 5-person** Agile team on programming and game design, developing an app integrating **Supabase** with **Unity** using **C#, SQL**, and **PostgREST** for secure database management.
- **Built** the backend schema from scratch in **Supabase**, replacing the previous **Firebase** implementation.
- **Developed** a **Supabase** Edge Function and linked it to a **WordPress** verification page using authentication tokens.

Dream in Green – Software Developer Volunteer | Miami, Florida

September 2024 – December 2024

- **Collaborated** in a **5-person** Agile team to **build** the application of **Recyclepedia** using **JavaScript** and **Expo**, delivering location-specific recycling guidance across **100%** of Miami-Dade County (**34 municipalities**, and **~2.7M residents**).
- **Implemented** a location-based **API** so users could view the Miami recycling sector and materials, and added a calendar feature that saves important events by persisting event records in **Firebase** collections/documents.

INIT – Mentor | Miami, Florida

August 2024 – December 2024

- **Taught Python** fundamentals to **30** middle-school students through interactive coding lessons.
- **Used** Tracy the Turtle exercises and mini-projects to reinforce loops, conditionals, and problem-solving.

PROJECTS

Invently – Full-Stack Developer

- **Built** a **full-stack** inventory management system using **HTML**, **CSS**, **JavaScript**, and **Firebase**.
- **Led** Agile Scrum sprints to improve reliability, strengthen database security, and optimize real-time sync.

Adoptly – iOS Developer

- **Built** an **iOS** app that lets users browse and search **adoptable pets** with a clean **SwiftUI** card + detail view experience.
- **Implemented** **Supabase** authentication and database tables to support user profiles and saved/favorited pets.

Benson Run – Game Developer

- **Developed** this 2D runner game in **Unity** using **C#**, implementing levels, gameplay mechanics, and custom UI.
- **Published** a tested version of the game on **itch.io**, gaining hands-on experience in 2D game development.

ACTIVITIES & AFFILIATIONS

Capstone Senior Project Showcase | **Developer** | Florida International University

December 2024

- **Developed** and presented **Invently** at the Capstone Senior Project Showcase, placing **1st** out of **30 teams**.

CodePath E3 Program | **Miami Lead** | Florida International University

January 2025 – August 2025

- **Led & organized** 4 events and **mentorship** to support more than **35** Computer Science students across Miami.

ShellHacks Hackathon | **Hacker** | Florida International University

September 2023

- **Led** full-stack development and presented **Captain AI** at ShellHacks, placing **7th** in a category of **12 teams**.
